Claims 1 and 27-36 are rejected under 35 U.S.C. 102(g) as being unpatentable over the count of Interference No. 104570.

The rejection of claims 1 and 27-36 above based upon the count of Interference No. 104570, to which applicant is a party, is a provisional rejection for the purpose of resolving all remaining issues in this application. The provisional assumption that the count is prior art under 35 U.S.C. 102(g) against this application may or may not be true, and the prosecution in this case will be suspended pending final determination of priority in the interference if and when no other issues remain.

Therefore, the outcome of Interference No. 104570 has a material bearing on the patentability of the claims in this application. Prosecution of this application remains SUSPENDED pending a final decision in the interference, or 6 months, whichever is sooner.
